HR Ishodište staze je u planinskom selu Ljubotić. Od parkirališta kod crkve kreće se cestom u selo. Ilijev odvojak uz ogradišni sid seoskog domaćinstva Vrata Velebita vodi do posljednjih kuća, taz kojiju potiče polusutinu uspon do Renjevackih mirila. Trud uljen u uspon ovdje je nagnaren prekrasnim pogledom. U nastavku se naša staza odvaja lijevo i krušta se prema dolini uz čiju rub prolazi novija makadamska cesta. Njome se stiže do Bristovčića Ljubotića, najvećeg očuvanog lokaliteta s preko 300 obitelji.

Nastavlja se do napuštenog zaseoka Livodice, gdje staza skreće lijevo i počinje se lagano spuštati prema moru. Na travnatoj zaravni, odvojak staze skreće lijevo, vodi kroz napušteni zaseok Križ, preko krštevitog platoa do prostrane zarvni s dva bukovim polozjenim lokalitetima (Križ i Lisarica) te vidikovcem na rubu litice. Slijedi šetnja do zaseoka Lug Paripov, odakle se vrati u Ljubotić.

GB The starting point is in the Ljubotić village. From the parking lot near the church, the road leads to the village. The left branch along the fence wall of the family farm of Vrata Velebita leads to the last houses, after which a half-hour ascent to Renjevacka mirila starts. The effort put into climbing here gets rewarded with a magnificent view. Trail branches off to the left and descends towards a valley with a newer macadam road on its edge. It leads to Bristovčića mirila, the largest prehistoric site with more than 300 families.

Continues to the abandoned hamlet of Livodice, where the trail turns left and slowly descends towards the sea. On the grassy plateau, the trail turns left, leads through the abandoned hamlet or Križ, across the karstic plateau to a vast plateau with two interestingly located sites (Križ and Lisarica) and a viewpoint at the edge of the cliff. This is followed by the walk to the hamlet of Lug Paripov, where you take the road or path that returns to Ljubotić.

HR Staza se nastavlja na stazu br. 5. Od planinarskog doma počinje strmi uspon kroz šumu crnog bora na Malih Močila, odakle se otvara pogled na kanjon Velike Paklenice, bukove šume uvršte na Popis svjetske baštine UNESCO-a i vrhove u 1500 m nadmorske visine. Dalje se staza probija kroz zanimljive krške formacije do Grabove doline, a potom slijedi strmi silazak serpentinama natrag u kanjon.

GB The trail is a continuation of the trail 5. A steep climb starts from the mountain lodge through a black pine forest to Malih Močila, opening the view of Velika Paklenica canyon, beech forests included in the UNESCO World Heritage List, and the peaks at 1500 metres above sea level. Further on, the trail winds through the interesting karst formations to Grabove doline, followed by a steep descent through serpentine paths back into the canyon.

HR Staza se nastavlja na stazu br. 7. Ispred ulaza u špilju Manita peć, putokaz upućuje na stazu koja se najprije kratko spušta, a zatim se počinje uspinjati uz sipare i stijene, što ovaj uspon svakako čini vrijednim trutom. Povratak započinje silazkom između golemih stijena. U ljetnim mjesecima potok presuši, što setnji kanjonom daje potpuno novu dimenziju. Po izlasku iz NP-a Paklenica, skreće se lijevo preko mosta i prati stazu 1 do ishodišta.

GB From the entrance reception in the canyon of Mala Paklenica, the trail is easy at first, until the entrance to the very bed of the Mala Paklenica stream. Further, the path leads through the stream bed between huge rocks. There is no established path here, so the skill of moving through the wild becomes crucial. Smaller sections of the trail are via ferratas. After 4 hours of the exciting canyon, the trail emerges from the stream bed with a steep ascent, followed by a relaxing walk through the meanders of Njive Ljekine i Grabove doline.

This is followed by a steep descent towards the section of a steep descent towards Velika Paklenica canyon, after which the trail becomes smoother, wider and follows the bed of the eponymous stream. At Anića luka, the last descent on this section starts, by a rocky path offering a view of the water cascades of the eponymous stream. In summer months, the stream dries out, giving a completely new dimension to the walk in the canyon. Upon leaving the Paklenica National Park, turn left across the bridge and follow trail 1 to the starting point.
